News Article: Lopatcong, NJ - AcceleratedMfgBrokers.com announces the exclusive listing of a successful northeast based pump and valve manufacturing and repair company available for purchase. AcceleratedMfgBrokers.com said the company provides complete system design and installation as well as repair of existing systems. The listing states all repair and replacement parts for flow control equipment and facilities are manufactured in their shop. This in-house manufacturing capabilities allows the company to provide emergency repair services for aging infrastructure in a fraction of the time it would take to order a part from their largest competitors, according to AcceleratedMfgBrokers.com. The manufacturing company has established a streamlined engineering and manufacturing process which allows the company to produce custom products and repairs in days or a few short weeks time, which takes larger companies 20-25 weeks to complete, said Fran Brunelle, representative for the establishment being sold. "The pump and valve manufacturer being offered has expanded and thrived for three decades because of its manufacturing and engineering capabilities," said Brunelle. He added, "With the nation's aging infrastructure, the industry is poised for exponential growth." The company is competitively priced at \$2.45 million.
