News Article: Horsham, PA - APEXCO-PPSi (www.apexco-ppsi.com) announced today it has successfully achieved ISO 9001:2008 and ISO 13485:2003 Certification issued by G-PMC Registrars. The certifications demonstrate the company's commitment to customer satisfaction and continuous process improvement. ISO 9001:2008 is the title of a document (Standard) that outlines the requirements an organization must maintain in their quality system for ISO 9001:2008 certification. There are several different documents in the ISO 9000 family of standards, but ISO 9001:2008 is the only ISO standard that requires certification. ISO 13485:2003 specifies requirements for a quality management system where an organization needs to demonstrate its ability to provide medical devices and related services that consistently meet customer requirements and regulatory requirements applicable to medical devices and related services. The establishment of APEXCO's Quality Management System (QMS) made it possible to further pursue the company's vision and mission to consistently meet customer expectations while continually improving its processes, said Daryl Guberman, CEO of G-PMC Registrars, LLC. He added, "APEXCO has taken an important step to demonstrate its commitment to product performance, value and customer satisfaction by validating and certifying their quality management system under both ISO 9001:2008 and ISO 13485:2003 standards." APEXCO-PPSi General Manager, Bart Feys, head of engineering and development is delighted to have achieved such important certifications, "We have always been committed to providing an excellent level of service, as we strive to set standards of excellence in the manufacturing of stock shape products made from engineering plastics and exotic polymers. Now with the achievement of ISO 9001:2008 and ISO 13485:2003 this has been confirmed by outside experts," said Feys. About APEXCO-PPSi APEXCO-PPSi (a <http://www.apexco-ppsi.com>) is an ISO 9001:2008 and ISO 13485:2003 certified manufacturer that strives to set standards of excellence in the manufacturing of stock shape products made from engineering plastics and exotic polymers. The company delivers high-quality polymer product solutions that enable customers to meet their business goals more effectively. APEXCO excels in demanding applications that require resistance to high temperatures and aggressive environments, high purity, extreme wear properties while working to provide the highest quality products and the best service at the lowest cost of ownership. While high performance polymer customization could result in volumes of potential applications, APEXCO-PPSi understands that creating a highly specialized product requires knowledge of industry needs. Core markets include Oil & Gas, Electrical/Semiconductor, Industrial and Medical.
